

RECOMMENDED FOR ENGINES WITH +100,000 MILES**THIS KIT CONTAINS THREE OF OUR MOST POPULAR PRODUCTS:****\$39.95**

The Performance Restoration Kit is designed to restore your vehicle to its optimum performance. It contains three scientifically unique formulas that will clean the fuel delivery system, reduce harmful emissions, remove sludge and carbon buildup, restore the integrity of the piston rings and help extend the life of your engine.

1. Gas Fuel Purge

This product thoroughly cleans your entire fuel delivery system removing the varnish responsible for improper fuel burning.

12oz bottle

2. Sludge Out

This product thoroughly cleans the sludge buildup in the oil pan and engine block without damaging any moving mechanical parts. It will hold sludge and carbon buildup in suspension until the oil is changed. *12oz bottle*

3. Ring Free

This product will improve performance, compression and horsepower by freeing stuck piston rings. *12oz bottle*

Overall Performance Benefits:

Improves compression, horsepower, engine performance, lubricity

Reduces exhaust emissions, carbon, hesitation, engine knock, corrosion, fuel and oil consumption, occurrence of stuck rings, varnish buildup

Cleans Fuel Delivery System, oil pan, all moving metal parts

FOLLOW THESE DIRECTIONS EXACTLY TO ENSURE THE BEST PERFORMANCE IMPROVEMENT**A few things to know before you get started:**

Use the complete kit. These products are designed to work together to provide optimum protection and restoration of your engines performance.

Lubrilon's Performance Restoration Kit is compatible with all crude based and synthetic based engine oils of all viscosities. The use of these products will not harm catalytic converters.

For optimum protection, performance and power, we recommend that after completing the Performance Restoration Kit you use the [Gas Engine Protection Kit](#).

Do not mix our product with another. If your engine has some other kind of treatment in it we recommend that you first change the fluids and then add our products.

We strongly recommend that you keep up your manufacturers' maintenance program. Changing fluids regularly is the key to successful car maintenance.

Directions for Performance Restoration Kit:

For GAS engines up to 460 cubic inches or 7.5 liters:

You can use this kit either before or after performing an oil change. Directions for both are listed below:

Directions to use this kit before performing an oil change:

Add 12 fl oz of Sludge Out to your oil. Drive for 25 to 50 miles. This will give Sludge Out time to effectively remove sludge buildup.

Proceed with regular oil and filter change.

Add 12 fl oz of Ring Free to your oil.

Add 12 fl oz of Gas Fuel Purge to 10-20 gallons of fuel and do not fuel up again until the fuel gauge shows less than 1/4 tank of fuel.

We recommend waiting until the next oil change to add the [Gas Engine Protection Kit](#).

Directions to use this kit after having performed an oil change:

Add 12 fl oz of Ring Free to your oil.

Add 12 fl oz of Gas Fuel Purge to 10-20 gallons of fuel and do not fuel up again until the fuel gauge shows less than 1/4 tank of fuel.

Then remember to: Add 12 fl oz of Sludge Out to your oil before your next scheduled oil change. Drive for 25 to 50 miles. This will give Sludge Out time to effectively remove sludge buildup.

Proceed with regular oil and filter change.

We recommend that you now proceed with using the [Gas Engine Protection Kit](#).

You will start to notice a difference in your engine around 300 to 1,500 miles. Your car will run smoother, peppier and fuel consumption will drop, giving you more miles to the tank.

CAUTION: KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Do not induce vomiting. Seek medical attention. Wash hands thoroughly with soap and water after use.
