

**ONE TIME USE TREATMENT FOR ALL AUTOMOBILES AND LIGHT TRUCKS  
THIS KIT CONTAINS TWO OF OUR MOST POPULAR PRODUCTS:**

**\$49.95**

**1. Permanent Engine Protection**

Since 1975, this unique proven formula has been providing full-time protection and improved performance. Lubrilon's proprietary formulation chemically bonds a micro-thin Permafused™ Lubricant film to all metal surfaces inside an engine. Lubrilon reacts only with Pfl™ activated metal, leaving no build up that could change tolerances or alter oil flow. It is unequaled by modern day motor oils, synthetic lubricants, oil additives, moly or PTFE type engine treatments. The use of Lubrilon's Permanent Engine Protection will not void manufacturer's engine warranty. This one-time use product protects and extends the life of your engine. *12oz bottle*

**Overall Performance Benefits:**

- Protects** from Oil Shear, Oil Loss, Additive Breakdown, Acids, Dry Starts
- Improves** Compression, Horsepower, Fuel Mileage, Engine Life, Cold Weather Starts
- Reduces** Noise, Wear, Friction, Oil Consumption, Amp Draw, Idle Over heating, Corrosion

**2. Top End Diesel Treatment**

This product provides maximum protection by thoroughly cleaning the entire fuel delivery system and lubricating all metal components. It does not harm the catalytic converter. Lubrilon's proprietary SSL™ formulation lubricates the valve assembly and the upper portions of your cylinders, increasing fuel mileage and reducing wear. Depending on your driving habits, the lubricating effect lasts about 3,000 to 5,000 miles. *12oz bottle*

**Overall Benefits:**

- Removes** rust and corrosion \* **Alleviates** hesitation \* **Reduces** harmful emissions
- Improves** fuel economy \* **Cleans** fuel delivery system

**FOLLOW THESE DIRECTIONS EXACTLY TO ENSURE THE BEST PERFORMANCE IMPROVEMENT**

**A few things to know before you get started:**

Lubrilon's Diesel Engine Protection Kit is compatible with all crude based and synthetic based engine oils of all viscosities. For new and rebuilt engines: Do not use our Lubrilon's Engine Protection Kit until you have reached at least 5,000 miles and the rings have seated (had a chance to form to the cylinder walls).

For engines with 100,000 or more miles we suggest that you first use the [Diesel Engine Performance Restoration Kit](#). We recommend that you retreat with our Permanent Engine Protection every 100,000 miles for vehicles that tow, do a lot of stop and go city driving or have not maintained regular scheduled services.

Do not mix our product with another. If your engine has some other kind of treatment in it we recommend that you first change the fluids and then add our products.

We strongly recommend that you keep up your manufacturers' maintenance program. Changing fluids regularly is the key to successful car maintenance.

**Directions for Permanent Engine Protection:**

*For engines up to 460 cubic inches or 7.5 liters:*

Add 12 fl oz of permanent engine protection to your oil: at an oil change **-or-** if it has been less than 1,500 miles since your last oil change.

Drive for at least 1,500 miles before your next oil change.

You will start to notice a difference in your engine around 300 to 1,500 miles. Your car will run smoother, peppier and fuel consumption will drop, giving you more miles to the tank.

**Directions for Top End Diesel treatment:**

*For diesel engines only:*

Add 12 fl oz of Top End Diesel Treatment to 10-20 gallons of fuel.

We suggest treating your fuel system with Top End Diesel Treatment every 3,000 to 5,000 miles.

**CAUTION: KEEP OUT OF REACH OF CHILDREN**

Harmful if swallowed. Do not induce vomiting. Seek medical attention. Wash hands thoroughly with soap and water after use.
